

Monoclonal Anti-human, canine DC-SIGN/CD209 Product reference: DDX0202

Description

DC-SIGN ("DC Specific, ICAM-3 Grabbing, Nonintegrin") / CD209 and liver/lymph node-specific ICAM-3-grabbing nonintegrin (L-SIGN) (CD299/DC-SIGNR for DC-SIGN-related molecule; DC-SIGN2) are closely related genes that map to chromosome 19p13.3.Both genes encode a member of the C-type lectin family of type II transmembrane proteins. The two receptors are 77% identical at the amino acid level, have similar ligands. They are expressed in different tissues. DC-SIGN is expressed on dendritic cells and macrophages. L-SIGN is found in the endothelial cells of liver, lymph nodes, and placenta and is absent on DCs and macrophages. Both receptors have been shown to interact with ICAM-3–DC-SIGN–is a high affinity receptor for HIV gp120,-(*Soilleux EJ. 2003, Clinical Science 104, 437; Dakappagari N., et al. 2006, The Journal of Immunology,176, 426-; Geijtenbeeck T.B., et al. 2000, Cell, 100, 575).Bashirova A. et al., 2001, J.Exp. Med., 193, 671)*.Antibodies have been selected with NIH3T3 transfected cells with either L-SIGN or DC-SIGN.

Clone:	102E11.06
Species:	mouse
Specificity:	human L-SIGN and human DC-SIGN
Immunogen:	HeLa cells stably transfected-with human DC-SIGN
Species cross- reactivity:	human L-SIGN, dog
Isotype:	IgG2b, κ
Formulation/size:	Purified : 100 µg in 200µl / 50 µg in 100 µl Tris-NaCl pH 8
	Coupled : 100 μ g in 200 μ l / 50 μ g in 100 μ l PBS 50% glycerol

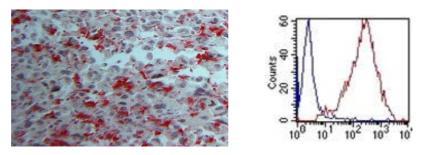

Available formats:

Reference N°		Format	Application tosted
50 µg	100 µg	rormat	Application tested
DDX0202P-50	DDX0202P-100	purified	Surface flow cytometry, Formol-paraffin, IHC
DDX0202A488-50	DDX0202A488-100	Alexa-fluor® 488	Surface Flow cytometry , IF
DDX0202A546-50	DDX0202A546-100	Alexa- fluor® 546	IF
DDX0202A647-50	DDX0202A647-100	Alexa- fluor® 647	Surface Flow cytometry
DDX0202B-50	DDX0202B-100	Biotin (on request)	Surface flow cytometry, IHC

Other clones available on request

Applications tested

flow cytometry and formol-embedded paraffin IHC

IHC stainingparaffin-embedded human tonsil section with 102E11.06

FACS staining of DC -SIGN-transfected Hela cells with 102E11.06

Usage recommendation:	 *This monoclonal antibody may be used between 1-20 μg/ml *Optimal dilution should be determined by each laboratory for each application *Coupled antibody: to maintain RT before using 	
Aliquot storage conditions	-20°C. KEEP CONTENTS STERILE: no preservative. <u>Purified</u> antibodies: avoid repeated freeze/thaw cycles. <u>Coupled</u> antibodies: glycerol protects from freezing.	

Not for use in Humans. For research purpose only contact@dendritics.net +33(0)4.72.71.74.03
