

Monoclonal Anti-human DC-SIGN/CD209

Product reference: DDX0204

Description

DC-SIGN ("DC Specific, ICAM-3 Grabbing, Nonintegrin") / CD209 and liver/lymph node-specific ICAM-3-grabbing nonintegrin (L-SIGN) (CD299/DC-SIGNR for DC-SIGN-related molecule; DC-SIGN2) are closely related genes that map to chromosome 19p13.3.Both genes encode a member of the C-type lectin family of type II transmembrane proteins. The two receptors are 77% identical at the amino acid level, have similar ligands. They are expressed in different tissues. DC-SIGN is expressed on dendritic cells and macrophages . L-SIGN is found in the endothelial cells of liver, lymph nodes, and placenta and is absent on DCs and macrophages. Both receptors have been shown to interact with ICAM-3-DC-SIGN-is a high affinity receptor for HIV gp120, (Soilleux EJ. 2003, Clinical Science 104, 437-; Dakappagari N., et al. 2006, The J Immunol, 176, 426; Geijtenbeeck T.B., et al. 2000, Cell, 100, 575; Bashirova A. et al., 2001, J.Exp. Med., 193, 671) Antibodies have been selected with NIH3T3 transfected cells with either L-SIGN, or DC-SIGN.

Clone: 108C7.01 **Species** mouse

Specificity: human DC-SIGN

Immunogen: HeLa cells stably transfected-with human DC-SIGN

Specied cross- reactivity: human **L-SIGN**. Not tested on other species

Isotype: IgG2b, k

Purified: 100 μg in 200μ1 / 50 μg in 100 μl Tris-NaCl pH 8 Formulation/size:

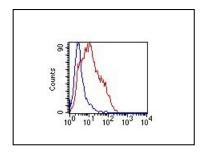

Coupled: 100 µg in 200 µl / 50 µg in 100 µl PBS 50% glycerol

Available formats:

Reference N°		Format	Application tested
50 μg	100 μg	rormat	Application tested
DDX0204P-50	DDX0204P-100	purified	Surface flow cytometry, HIV gp120 binding studies
DDX0204A488-50	DDX0204A488-100	Alexa-fluor®488	Surface Flow cytometry
DDX0204A546-50	DDX0204A546-100	Alexa- fluor®546	IF
DDX020A647-50	DDX020A647-100	Alexa- fluor®647	Surface Flow cytometry
DDX0204B-50	DDX0204B-100	Biotin (on request)	Surface Flow cytometry

Other clones available on request

Applications tested: flow cytometry and blocking studies

HIV-gp120 binding on DC-SIGN HeLa transfected cells. red: without blocking, blue: blocking activity

Usage recommendation: *This monoclonal antibody may be used between 5-20 µg/ml

*Optimal dilution should be determined by each laboratory for each

application

*Coupled antibody: to maintain RT before using

Aliquot storage conditions: -20°C. KEEP CONTENTS STERILE: no preservative.

> Purified antibodies: avoid repeated freeze/thaw cycles. Coupled antibodies: glycerol protects from freezing.

Not for use in Humans. For research purpose only
