

## Hepatitis B virus surface antigen, Pre-S1 peptides (Recombinant)

Product #: Pre-S1 peptide : BCL-AGS1-01(no Tag), BCL-AGS1-21(Tagged)

The surface antigen of Hepatitis B virus (HBV) is composed of Pre-S1, Pre-S2, and S domains. The longest surface antigen, which has all the three domains, is called L protein, the middle sized antigen which has Pre-S2 and S domains, is called M protein, and the smallest one consisted of S domain is called S protein. S protein is generally also called HBsAg. Pre-S1 domain is known to be the target molecule of HBV receptors expressed on human hepatic cell surface. On the other hand, Pre-S2 domain is reportedly related to HBV invasion into cells and carcinogenesis. Thus, Pre-S1 and Pre-S2 domains are becoming more and more important in HBV research field.

The products are recombinant peptides having Pre-S1 domain. Two types of peptides are available; one has no tag peptide, and the other is fusion peptide with a tag-peptide. Choose either one suitable for your research purpose.

Production cell : E.coli  
 Product form : White lyophilized powder  
 content : 100 µg  
 Subtype : adr  
 Dissolution : Pour 100µL of DW to make 1000 µg/mL of protein in 1% sucrose containing PBS (137mM NaCl, 8.1mM Na2HPO4 · 12H2O, 2.68mM KCl, 1.47mM KH2PO4, pH7.3).  
 purity : Over 95% (see below SDS-PAGE)  
 Preservation : -20°C  
 Application : ELISA, WESTERN and others

Amino acid sequence :

## 遺伝子組換 B 型肝炎ウイルス表面抗原 Pre-S1 ペプチド

### Hepatitis B Virus Surface Antigen Pre-S1 peptides (Recombinant)

Product #: Pre-S1 ペプチド : BCL-AGS1-01(Tag 無) BCL-AGS1-21(Tag 有)

B 型肝炎ウイルス (HBV) 表面抗原 (HBsAg) の全長は L タンパク質 (抗原) と呼ばれ、Pre-S1、Pre-S2、S、3 つの領域から構成されています。Pre-S1 領域は HBV がヒト肝細胞を認識するドメインで、ヒト肝細胞には Pre-S1 領域を認識する受容体があると言われています。一方、Pre-S2 領域は HBV の細胞内への侵入に係る他、肝細胞ガン発症にも関係すると言われています。

本品は、Pre-S1 領域を持つ遺伝子組換えペプチドです。Tag 付のペプチドと Tag なしのペプチドの 2 種類を用意しています。

発現株	: 遺伝子組み換え大腸菌 (E.coli)
状態	: 凍結乾燥 (白色)
容量	: 100 µg
サブタイプ	: adr
溶解方法	: 100 µg 入りバイアルへ精製水を 100µL バイアルに加えて下さい。抗原濃度 1000 µg/mL の 1% sucrose 含有 PBS (137mM NaCl、8.1mM Na2HPO4・12H2O、2.68mM KCl、1.47mM KH2PO4、pH7.3) 液となります。
純度	: 95%以上 (SDS-PAGE 参照)
保存	: -20°C (出荷後 3 年間保証)
用途	: ELISA やウェスタン用の標準抗原

アミノ酸配列 :
