

CORTISOL

The Cortisol ELISA test is an immunoassay designed for the quantitative determination of Cortisol in serum/plasma or urine samples. The test is intended for professional use as an aid in the diagnosis and monitoring of physiological/pathological conditions related to serum/plasma Cortisol in equine and related species.

Results: 1 Hour

Storage: 4-8°C

Procedure 2 Step incubation

Sensitivity: 0.5 ng/mL

Shelf-life 6 months
