

ESTRADIOL

The Microwell Estradiol EIA is an enzyme immunoassay system for quantitative determination of Estradiol levels in serum/plasma/urine samples of Equine and related species. The test is intended for professional use as research tool in monitoring of conditions related to serum/plasma/urine levels of Estradiol.

Results: 2 Hours

Storage: 4-8°C

Procedure 2 Step incubation

Sensitivity: 5 pg/mL

Shelf-life 6 months
