Catalog No. 01879-96

Anti-Mucin M-GGMC-1 (Clone : HIK1083) [GlcNAc α 1-R]

BACKGROUND

M-GGMC-1 is a mouse monoclonal antibody which recognizes the peripheral alpha-linked *N*-acetylglucosamine residue present in the carbohydrate moiety of the mucin molecule and reacts with oligosaccharides bearing a peripheral α -GlcNAc structure. M-GGMC-1 recognizes the mucins derived from the normal gastric mucosal cells (mucosal neck cells and pyloric gland cells) and Brunner's gland cells in the gastrointestinal tract of mammalian. In addition, M-GGMC-1 can be used to detect adenoma malignum in the uterine cervical glands have been reported. This antibody is a useful tool for elucidating the biological role of the specific sugar chain.

Product type	Primary antibody
Immunogen	Rat Gastric mucin
Host Species	Mouse
Fusion Partner	Sp2/0
Clone Designation	HIK1083
Isotype	IgM, κ
Source	Hybridoma cell culture
Purification	-
Form	Culture supernatant including 1% Bovine serum albumin and 0.05% NaN ₃
Formulation Buffer	-
Concentration	-
Volume	250 μ L
Label	Unlabeled
Specificity	Mucin-type oligosaccharides bearing a peripheral α -linked GlcNAc structure Epitope : Sugar chain motif; GlcNAc α 1-R
Cross species reactivity	-
Storage Conditions	Store at -20°C or lower and avoid freeze / thaw cycles.

**Application notes
Recommended
dilutions**

- **ELISA** : 1/10 – 1/1000
- **Immunohistochemistry**: 1/5 - 1/50 (formalin-fixation, paraffin-embedded)

Other applications have not been tested.

Optimal dilutions/concentrations should be determined by the end user.
