

VPS33B Polyclonal Antibody

catalog number: E-AB-17278

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

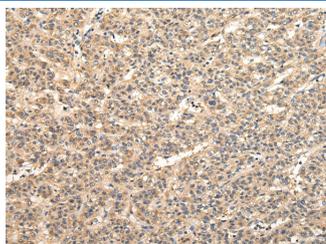

Reactivity	Human;Mouse;Rat
Immunogen	Fusion protein of human VPS33B
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

Applications

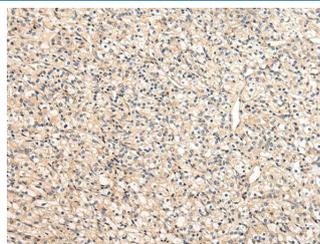

Recommended Dilution

IHC	1:30-150
------------	----------

Data

Immunohistochemistry of paraffin-embedded Human liver cancer tissue using VPS33B Polyclonal Antibody at dilution 1:40

Immunohistochemistry of paraffin-embedded Human prostate cancer tissue using VPS33B Polyclonal Antibody at dilution 1:40

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

Vesicle mediated protein sorting plays an important role in segregation of intracellular molecules into distinct organelles. Genetic studies in yeast have identified more than 40 vacuolar protein sorting (VPS) genes involved in vesicle transport to vacuoles. This gene is a member of the Sec-1 domain family, and encodes the human ortholog of rat Vps33b which is homologous to the yeast class C Vps33 protein. The mammalian class C vacuolar protein sorting proteins are predominantly associated with late endosomes/lysosomes, and like their yeast counterparts, may mediate vesicle trafficking steps in the endosome/lysosome pathway. Mutations in this gene are associated with arthrogyrosis-renal dysfunction-cholestasis syndrome. Alternative splicing results in multiple transcript variants.
