

Recombinant Human AST Protein, HEK293 Lysate

Catalog Number: 230-10270-100

Data Sheet / Certificate of Analysis (CoA)

Last Revised: 11/26/2024

Source

Species	Human
Accession Number	P17174-1
Gene Symbols	GOT1
Synonyms	AST, transfected HEK293 cell lysate, Glutamic-Oxaloacetic Transaminase 1, Glutamate Oxaloacetate Transaminase 1, Glutamic-Oxaloacetic Transaminase 1, Soluble, Cysteine Aminotransferase, Cytoplasmic, Cysteine Transaminase, Cytoplasmic, Aspartate Aminotransferase 1, Aspartate Transaminase 1, Transaminase A, EC 2.6.1.1, CAspAT, CCAT, Glutamic-Oxaloacetic Transaminase 1, Soluble (Aspartate Aminotransferase 1), Testis Secretory Sperm-Binding Protein Li 196a, Growth-Inhibiting Protein 18, EC 2.6.1.3, ASTQTL1, GIG18, AST1.
Expressed Region	Ala2-Gln413

Preparation

Expression System	HEK293 cells
Tag	N-terminal histidine tag
Purity	Unpurified cell lysate. HEK293 cells transfected with expression vectors harboring target gene were harvested and washed with PBS twice. The cell pastes were re-suspended with ice-cold PBS containing mammalian cell protease inhibitor cocktail and further lysed with freeze-thaw cycles. After clarifying with 20,000 g centrifugation at 4°C for 30 min, the lysate was aliquoted, lyophilized, and stored at -80°C immediately. Protein concentration was determined by BCA kit (Thermo Scientific, Inc.) using BSA as protein standard. The gene overexpression in lysate was confirmed by Western blotting using anti-His tag antibody and/or target-specific antibodies and the lysate derived from HEK293 cells transfected with the empty expression vector was used as a negative control.
Molecular Weight	Recombinant protein has a calculated molecular mass of 46. The actual molecular weight may increase differently due to the potential post-modifications (PTMs).

Specifications

Format	Lyophilized powder
Formulation	Lyophilized from a 0.2 µm filtered solution in PBS containing mammalian cell protease inhibitor cocktail
Concentration	Determined by Pierce BCA protein assay kit
Reconstitution	Briefly spin the vial and bring the contents to the bottom prior to opening. It is recommended to reconstitute at 0.5 - 1 mg/mL with sterile deionized water.

Shipping

The product is shipped with ice packs. Upon arrival, immediately store it at the temperature recommended below.

Storage/Stability

- Use a manual defrost freezer and avoid repeated freeze-thaw cycles.
- Upon arrival, the lyophilized protein may be stored for 2 weeks at 4°C.
- For long term storage, it is recommended to store desiccated below -20°C in a manual defrost freezer.
- Generally, the shelf life is up to 12 months from date of receipt at -20°C or -80°C under sterile conditions.
- Following reconstitution, the protein may be stored for 2 weeks under sterile conditions at -20°C. For long term storage, it is recommended to make appropriate aliquots at -20°C or -80°C.
