

## Recombinant *Sus scrofa* (pig) Fatty Acid Binding Protein, Intestinal (I-FABP), Transfected HEK293 Cell Lysate

Catalog Number: 230-10327-100

### Data Sheet / Certificate of Analysis (CoA)

Last Revised: 11/26/2024

### Source

Species	<i>Sus scrofa</i>
Accession Number	Q45KW7
Gene Symbols	FABP2
Synonyms	Fatty acid-binding protein, intestinal, Fatty Acid Binding Protein 2, Intestinal-Type Fatty Acid-Binding Protein, Fatty Acid Binding Protein 2, Intestinal, I-FABP, FABPI, Fatty Acid-Binding Protein 2.
Expressed Region	Ala2-Asn132

### Preparation

Expression System	HEK293 cells
Tag	N-terminal his-tag
Purity	Unpurified cell lysate. HEK293 cells transfected with expression vectors harboring target gene were harvested and washed with PBS twice. The cell pastes were re-suspended with ice-cold PBS containing mammalian cell protease inhibitor cocktail and further lysed with freeze-thaw cycles. After clarifying with 20,000 g centrifugation at 4°C for 30 min, the lysate was aliquoted, lyophilized, and stored at -80°C immediately. Protein concentration was determined by BCA kit (Thermo Scientific, Inc.) using BSA as protein standard. The gene overexpression in lysate was confirmed by Western blotting using anti-His tag antibody and/or target-specific antibodies and the lysate derived from HEK293 cells transfected with the empty expression vector was used as a negative control.
Molecular Weight	Recombinant protein product has a calculated molecular mass of 15. The actual molecular weight may increase slightly due to the potential post-translational modifications (PTMs).

### Specifications

Format	Lyophilized powder
--------	--------------------

<b>Formulation</b>	Lyophilized from a 0.2 µm filtered solution in PBS (pH 7.4) containing mammalian cell protease inhibitor cocktail
<b>Concentration</b>	Determined by BCA protein assay
<b>Reconstitution</b>	Briefly spin the vial and bring the contents to the bottom prior to opening. It is recommended to reconstitute at 0.5 - 1 mg/mL with sterile deionized water.

## Shipping

---

The product is shipped with ice packs. Upon arrival, immediately store it at the temperature recommended below.

## Storage/Stability

---

- Use a manual defrost freezer and avoid repeated freeze-thaw cycles.
- Upon arrival, the lyophilized protein may be stored for 2 weeks at 4°C.
- For long term storage, it is recommended to store desiccated below -20°C in a manual defrost freezer.
- Generally, the shelf life is up to 12 months from date of receipt at -20°C or -80°C under sterile conditions.
- Following reconstitution, the protein may be stored for 2 weeks under sterile conditions at -20°C. For long term storage, it is recommended to make appropriate aliquots at -20°C or -80°C.
