## Recombinant Human Interleukin-7 Protein, Biotinylated

Catalog Number: 230-30114B

Data Sheet / Certificate of Analysis (CoA)

Last Revised: 11/27/2024

Source

**Species** Human

Accession Number P13232-1

Gene Symbols IL7

Synonyms Human Interleukin-7 Protein

Expressed Region Asp26-His177

**Preparation** 

Expression System HEK293 cells

Tag N-terminal His-tag. The primary amino groups (-NH2) at the N-terminus and the side

chains of lysine (K) residues were biotin-conjugated using the standard chemical

labeling method.

Purity >90%

Molecular Weight Recombinant human IL-17 protein has a calculated molecular mass of 17 kDa. Due

to 3 glycosylation sites, it migrates as approximately 30 kDa protein bands in SDS-

PAGE under DTT, beta-mercaptoethanol reducing conditions.

**Specifications** 

Format Lyophilized powder

**Formulation** Lyophilized from a 0.2 ?m filtered solution in PBS (pH 7.4)

**Concentration** Determined by BCA protein assay

**Reconstitution** Briefly spin the vial and bring the contents to the bottom prior to opening. It is

recommended to reconstitute at 0.5 - 1.0 mg/mL with sterile deionized water.

For Research Use Only Page 1 of 2

## Recombinant Human Interleukin-7 Protein, Biotinylated

Catalog Number: 230-30114B

## **Shipping**

The product is shipped with ice packs. Upon arrival, immediately store it at the temperature recommended below.

## Storage/Stability

- Use a manual defrost freezer and avoid repeated freeze-thaw cycles.
- Upon arrival, the lyophilized protein may be stored for 2 weeks at 4°C.
- For long term storage, it is recommended to store desiccated below -20°C in a manual defrost freezer.
- Generally, the shelf life is up to 12 months from date of receipt at -20°C or -80°C under sterile conditions.
- Following reconstitution, the protein may be stored for 2 weeks under sterile conditions at -20°C. For long term storage, it is recommended to make appropriate aliquots at -20°C or -80°C.
