MET (pY1234 / Y1235) Antibody

Catalogue No.: abx000455

Western blot analysis of extracts from HUVEC cells, using Phospho-MET-Y1234/Y1235 antibody (abx000455).

MET (pY1234/Y1235) Antibody is a Rabbit Polyclonal antibody against MET (pY1234/Y1235). The proto-oncogene MET product is the hepatocyte growth factor receptor and encodes tyrosine-kinase activity. The primary single chain precursor protein is post-translationally cleaved to produce the alpha and beta subunits, which are disulfide linked to form the mature receptor. Various mutations in the MET gene are associated with papillary renal carcinoma. Two transcript variants encoding different isoforms have been found for this gene.
