G Protein Alpha Z (GNAZ) Antibody

Catalogue No.: abx000778

Western blot analysis of extracts of mouse brain, using GNAZ antibody (abx000778).

GNAZ Antibody is a Rabbit Polyclonal antibody against GNAZ. The protein encoded by this gene is a member of a G protein subfamily that mediates signal transduction in pertussis toxin-insensitive systems. This encoded protein may play a role in maintaining the ionic balance of perilymphatic and endolymphatic cochlear fluids.
