Glycogen Synthase Kinase 3 Beta (GSK3B) Antibody

Catalogue No.: abx001694

Western blot analysis of extracts of mouse brain, using GSK3B antibody (abx001694) at 1/1000 dilution.

GSK3B Antibody is a Rabbit Polyclonal antibody against GSK3B. The protein encoded by this gene is a serine-threonine kinase, belonging to the glycogen synthase kinase subfamily. It is involved in energy metabolism, neuronal cell development, and body pattern formation. Polymorphisms in this gene have been implicated in modifying risk of Parkinson disease, and studies in mice show that overexpression of this gene may be relevant to the pathogenesis of Alzheimer disease. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
