tRNA Methyltransferase 2 Homolog B (TRMT2B) Antibody

Catalogue No.: abx002527

Western blot analysis of extracts of various cell lines, using TRMT2B antibody (abx002527) at 1/1000 dilution.

TRMT2B Antibody is a Rabbit Polyclonal antibody against TRMT2B. This gene encodes a homolog of the TRM2 gene in *S. cerevisiae*. The yeast gene encodes a tRNA methyltransferase that plays a role in tRNA maturation. The yeast protein also has endo-exonuclease activity and may be involved in DNA double strand break repair. Alternative splicing results in multiple transcripts encoding different isoforms.
