Transcription Elongation Factor A Protein-Like 2 (TCEAL2) Antibody

Catalogue No.:abx030178

This gene encodes a member of the transcription elongation factor A (SII) like (TCEAL) gene family. Members of this family contain TFA domains and may function as nuclear phosphoproteins that modulate transcription in a promoter context-dependent manner. Multiple family members are located on the X chromosome. [provided by RefSeq].
