## **HIV 2 Envelope Protein**

Catalogue No.: abx060590

HIV 2 Envelope Protein (Recombinant) is a infectious disease antigen or toxin. This is a recombinant protein, corresponding to amino acids 390-702 from HIV 2 Envelope protein.

|                             |                                                                         |
|-----------------------------|-------------------------------------------------------------------------|
| <b>Target:</b>              | HIV 2 Envelope                                                          |
| <b>Origin:</b>              | Virus                                                                   |
| <b>Host:</b>                | E. coli                                                                 |
| <b>Tested Applications:</b> | ELISA, WB, LF                                                           |
| <b>Purification:</b>        | Purified from E. coli                                                   |
| <b>Form:</b>                | Liquid                                                                  |
| <b>Conjugation:</b>         | Unconjugated                                                            |
| <b>Storage:</b>             | Aliquot and store at -70 °C. Avoid repeated freeze/thaw cycles.         |
| <b>Expression:</b>          | Recombinant                                                             |
| <b>Buffer:</b>              | Buffer contains no preservative.                                        |
| <b>Directions for use:</b>  | Centrifuge before opening to ensure complete recovery of vial contents. |
| <b>Note:</b>                | This product is for research use only.                                  |
