Macerozyme R-10

Catalogue No.: abx082075

Macerozyme R-10 is a macerating enzyme. It is used to decompose plant tissue and to isolate single cells from leaf cells and cultured plant cells. It possesses high pectinase and hemicellulase activity.

Target:	Macerozyme
Conjugation:	Unconjugated
Storage:	Store at 2°C to 8°C.
Biological Activity:	3000 U/g
Note:	This product is for research use only.
