

**Total Antioxidant Capacity Assay Kit (Colorimetric Method)**

Catalogue No.: abx090678

Total Antioxidant Capacity Assay Kit for detection the TAC in serum, plasma, red or cultured cells, culture medium, animal or plant tissue homogenate.

**Material Required but not provided:**

1. 37°C incubator.
2. Microplate reader or spectrophotometer (wavelength: 520 nm).
3. Precisse piette and disposable pipette tips.
4. Centrifuge.
5. Vortex Mixer.

**Target:** Total Antioxidant Capacity Assay Kit**Test Range:** 0.2 U/ml - 55.2 U/ml**Sensitivity:** < 0.2 U/ml**Validity:** The validity for this kit is 6 months.**Storage:** Store at 2-8°C for 6 months.**Sample Type:** Serum, plasma, red or cultured cells, culture medium, animal or plant tissue homogenates.**Note:** This product is for research use only.
