Melamine Rapid Test Kit

Catalogue No.: abx092011

Melamine Rapid Test Kit is a Rapid Test Kit against Melamine. This kit uses the principle of competitive-inhibition-GICA. It can detect MEL (Melamine) in raw milk and milk sample.

Target: Melamine

Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Sensitivity: 500 ppb (ng/ml)

Storage: Store at 2-30 °C in a dry environment.

ELISA Type: Competitive Inhibition

Sample Type: Raw milk and milk sample.

Note: This product is for research use only.
Please note that our kits are optimised for detection of native samples, rather than recombinant proteins. We are unable to guarantee detection of recombinant proteins, as they may have different sequences or tertiary structures to the native protein.
