Up Plus RNA Extraction Kit

Catalogue No.: abx098093

Up Plus RNA extraction Kit is a ready-to-use reagent for the isolation of total RNA from cells and tissues. The addition of chloroform to the sample, and the following centrifugation separate the solution into an upper colorless aqueous phase (containing RNA), intermediate phase and a lower pink organic phase. RNA is specifically bound to silica-based spin column. Up Plus RNA extraction Kit provides powerful lysis and easy column based purification.

Target: RNA

Storage: Store the Up Plus reagent at 4 °C in the dark for 12 months. Store the other kit components at room temperature (15-25 °C) for 12 months.

Note: This product is for research use only.
