

Prealbumin Assay Kit

Catalogue No.: abx098451

Prealbumin Assay Kit is an Assay Kit by Immunoturbidimetry Method.

Based on the bottle type, product model can be classified in to Hitachi 7170, Hitachi 7060, Hitachi 7020, Beckman, Toshiba, Mindray, DuPont, Innova, Siemens, KHB, Abbott, Universal types, etc

This product is used to determine p realbumin content in human serum.

The PA in human serum meets the specific antibody (goat anti - human PA) in the liquid buffer, forming antigen - antibody complex, and the turbidity formed is proportional to the PA concentration in the linear range. PA concentration in the sample can be calculated by comparing the calibrator result with same processing.

R1: Reagent Composition	R2: Reagent Composition
Phosphate Buffer → 20 mmol/l	Phosphate Buffer → 30 mmol/l
PEG → Appropriate	Goat Anti-Human PA Antibody → Appropriate
Fat-moving agent, Preservatives → Appropriate	Preservatives
