

Tn5 Index Kit for Illumina

Catalogue No.: abx098893

Tn5 Index Kit for Illumina contains primers that are ideally suited for multiplex sample preparation for next-generation sequencing. This kit contains 12 unique Index 1 (i7) Primers (N701-N712) and 8 unique Index 2 (i5) Primers (N501-N508) at the concentration of 10 µM. 96 uniquely dual-indexed samples can be prepared using this kit.

Target: Tn5 Index Kit for Illumina

Storage: Store at -20 °C for one year.

Note: This product is for research use only.
