## **Library Amplification SuperMix**

Catalogue No.: abx098894

Library Amplification SuperMix is optimized for high fidelity, robust amplification of next generation sequencing (NGS) libraries regardless of GC contents. The ready-to-use 2xMix contains Fly DNA polymerase, dNTPs and optimized buffer, and requires only the addition of primers and template. High fidelity amplification. Low amplification bias. High sensitivity and high specificity. Hot start.

**Target:** Library Amplification SuperMix

**Storage:** Store at -20 °C for two years.

**Note:** This product is for research use only.
