## Library Quantification Kit for Illumina

Catalogue No.: abx098895

Library Quantification Kit for Illumina provides all reagents needed for qPCR based quantification of DNA libraries prepared for Illumina next generation sequencing platforms. Five linear DNA Standards with different GC contents are provided for customers to choose from. The kit also contains PCR primers which target the P5 and P7 adaptor sequences and Library Quantification qPCR SuperMix (2x) for library amplifications.

- Target:** Library Quantification Kit for Illumina
- Storage:** Store at -20 °C in the dark for one year.
- Note:** This product is for research use only.
