

Outer membrane protein A Antibody (FITC)

Catalogue No.: abx107779

Outer membrane protein A Antibody (FITC) is a Rabbit Polyclonal antibody conjugated to FITC against Outer membrane protein A found in *Salmonella typhi*. Outer membrane protein A is required for the action of colicins K and L and for the stabilization of mating aggregates in conjugation. It serves as a receptor for a number of T-even like phages. It also acts as a porin with low permeability that allows slow penetration of small solutes.

Target: Outer membrane protein A**Reactivity:** Bacteria**Host:** Rabbit**Clonality:** Polyclonal**Tested Applications:** ELISA**Recommended dilutions:** Optimal dilutions/concentrations should be determined by the end user.**Immunogen:** Recombinant *Salmonella typhi* Outer membrane protein A protein (27-349AA).**Purity:** > 95%**Purification:** Protein G.**Form:** Liquid**Isotype:** IgG**Conjugation:** FITC**Storage:** Aliquot and store at -20 °C. Avoid exposure to light. Avoid repeated freeze/thaw cycles.**Swiss Prot:** [Q8Z7S0](#)**GeneID:** [1247515](#)**Gene Symbol:** OMPA**Buffer:** 0.01 M PBS, pH 7.4, 0.03% Proclin-300 and 50% Glycerol.**Note:** This product is for research use only.
