Human Fc Fragment Of IgG, Low Affinity IIb, Receptor For (CD32) (FCGR2B) ELISA Kit

Catalogue No.:abx151502

Human FcγRII ELISA Kit is a sandwich ELISA kit for use with Serum, plasma and other biological fluids. This assay has high sensitivity and excellent specificity for detection of Receptor II For The Fc Region Of Immunoglobulin G (FcγRII). No significant cross-reactivity or interference between Receptor II For The Fc Region Of Immunoglobulin G (FcγRII) and analogues was observed.

Please note that this kit is also available as a CLIA Kit [abx492885](#).

Target: FcγRII

Reactivity: Human

Tested Applications: ELISA

Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.

Test Range: 46.88 pg/ml - 3000 pg/ml

Sensitivity: < 17.35 pg/ml

Validity: The validity for this kit is 6 months.

Storage: Store at 2°C to 8°C upon receipt.

Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Standard Form: Lyophilized

ELISA Detection: Colorimetric

ELISA Type: Sandwich

ELISA Data: Quantitative

Sample Type: Serum, plasma and other biological fluids.

Note: This product is for research use only. The range and sensitivity is subject to change. Please contact us for the latest product information. For accurate results, sample concentrations must be diluted to mid-range of the kit. If you require a specific range, please contact us in advance or write your request in your order comments.
