Coronavirus 229E Protein

Catalogue No.: abx260311

Coronavirus 229E (Recombinant) is a viral antigen from sars proteins.

Target:	CoV-229E
Host:	E. coli
Purity:	> 95% (12% PAGE with coomassie staining)
Purification:	Purified by standard chromatographic techniques.
Form:	Liquid
Conjugation:	Unconjugated
Storage:	Stable at 4 °C for up to one week. It is recommend to store this product at or below -18 °C. Avoid repeated freeze/thaw cycles.
Expression:	Recombinant
Sequence Fragment:	359 AA. Contains the nucleocapsid immunodominant regions.
Sequence:	The exact sequence is proprietary.
Tag:	C-terminal 6X His-tag.
Buffer:	PBS and 3 M urea.
Note:	This product is for research use only.
