LMP1 (156-164), IAL Peptide

Catalogue No.: abx266135

HPLC chromatogram of LMP1 (156-164), IAL Peptide. Buffer A: 0.1% trifluoroacetic acid in 100% acetonitrile; Buffer B: 0.1% trifluoroacetic acid in 100% water. Gradient: 30-50% A in 20 min. Wavelength: 220 nm. Column: Kromasil C18 (4.6 × 250 mm).

Mass spectrometry analysis of LMP1 (156-164), IAL Peptide.

LMP1 (156 - 164), IAL is a peptide. This product is supplied as a trifluoroacetate salt.

Target: LMP1 (156-164), IAL

Purity: 95.38% (HPLC)

Form: Lyophilized

Conjugation: Unconjugated

Storage: Store at -20°C. Avoid repeated freeze/thaw cycles. It is recommended that this product is wholly used within 6 months of receipt.

Molecular Weight: 1148.32

Molecular Formula: C₅₅H₈₁N₁₃O₁₄

Sequence: Ile-Ala-Leu-Tyr-Leu-Gln-Gln-Asn-Trp

Note: This product is for research use only.
