# Human Coxsackievirus group B (CVB) IgG ELISA Kit

Catalogue No.: abx364976

Coxsackievirus group B (CVB) IgG ELISA Kit is an ELISA Kit against Coxsackievirus group B (CVB) IgG.

|                               |                                                                                                                                                                                                                                                                                                                                                                               |

| <b>Target:</b>                | Coxsackievirus group B (CVB) IgG                                                                                                                                                                                                                                                                                                                                              |
| <b>Reactivity:</b>            | Human                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Tested Applications:</b>   | ELISA                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Recommended dilutions:</b> | Optimal dilutions/concentrations should be determined by the end user.                                                                                                                                                                                                                                                                                                        |
| <b>Validity:</b>              | The validity for this kit is 12 months.                                                                                                                                                                                                                                                                                                                                       |
| <b>Storage:</b>               | Store at 2°C to 8°C upon receipt.                                                                                                                                                                                                                                                                                                                                             |
| <b>Stability:</b>             | The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. |
| <b>Standard Form:</b>         | Lyophilized                                                                                                                                                                                                                                                                                                                                                                   |
| <b>ELISA Detection:</b>       | Colorimetric                                                                                                                                                                                                                                                                                                                                                                  |
| <b>ELISA Type:</b>            | Indirect                                                                                                                                                                                                                                                                                                                                                                      |
| <b>ELISA Data:</b>            | Qualitative                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Sample Type:</b>           | Serum, plasma                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Note:</b>                  | <p>This product is for research use only.</p> <p>Please note that our ELISA and CLIA kits are optimised for detection of native samples, rather than recombinant proteins. We are unable to guarantee detection of recombinant proteins, as they may have different sequences or tertiary structures to the native protein.</p>                                               |
