## Amyloid Oligomers (A11) Antibody (RPE)

Catalogue No.: abx446702

Amyloid Oligomers (A11) Antibody (RPE) is a Rabbit Polyclonal against Amyloid.

|                               |                                                                                                                                                                                                                       |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Target:</b>                | Amyloid                                                                                                                                                                                                               |
| <b>Reactivity:</b>            | Human, Mouse, Rat, Eukaryote                                                                                                                                                                                          |
| <b>Host:</b>                  | Rabbit                                                                                                                                                                                                                |
| <b>Clonality:</b>             | Polyclonal                                                                                                                                                                                                            |
| <b>Tested Applications:</b>   | WB, IHC, IF/ICC, IP, ELISA                                                                                                                                                                                            |
| <b>Recommended dilutions:</b> | WB: 1/1000, IP: 1/1000. Optimal dilutions/concentrations should be determined by the end user.                                                                                                                        |
| <b>Immunogen:</b>             | Synthetic molecular mimic of soluble oligomers                                                                                                                                                                        |
| <b>Purification:</b>          | Protein A Purified                                                                                                                                                                                                    |
| <b>Conjugation:</b>           | RPE                                                                                                                                                                                                                   |
| <b>Specificity:</b>           | Recognizes all types of amyloid oligomers. Appears to recognize a peptide backbone epitope that is common to amyloid oligomers, but is not found in native proteins, amyloidogenic monomer or mature amyloid fibrils. |
| <b>Storage:</b>               | Store at -20°C.                                                                                                                                                                                                       |
