

Mouse FAP shRNA Plasmid

Catalogue No.: abx970281

shRNA Plasmid to inhibit FAP expression by RNA interference. This product contains 3 separate slightly different shRNA sequences which knock down mouse FAP gene specifically. Each vial contains 50 µg of lyophilized shRNA.

Target:	FAP
Reactivity:	Mouse
Host:	E. coli
Tested Applications:	RNAi
Form:	Lyophilized
Specificity:	FAP shRNA Plasmid (Mouse) contains 3 different target-specific plasmids each encoding 19-23 nt (plus hairpin) shRNAs designed to knock down gene expression. Each plasmid contains a resistance gene for the selection of cells stably expressing shRNA.
Storage:	Store lyophilized shRNA plasmid DNA at -20 °C with desiccant. Stable for one year. Once resuspended, store at 4 °C for short term storage or -80 °C for long term storage. Avoid repeated freeze/thaw cycles.
Swiss Prot:	P97321
GeneID:	14089
Gene Symbol:	FAP
Directions for use:	Resuspend lyophilized shRNA plasmid DNA in 500 µl of deionised water. Each vial contains 50 µg of lyophilized shRNA plasmid DNA. Suitable for up to 50 transfections.
Quality Control:	The sequence of shRNA is guaranteed by sequencing.
Note:	This product is for research use only.
