

CAPN6 Antibody
Purified Mouse Monoclonal Antibody (Mab)
Catalog # AM8453b

Specification

CAPN6 Antibody - Product Information

Application	WB, FC,E
Primary Accession	Q9Y6Q1
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1

CAPN6 Antibody - Additional Information

Gene ID 827

Other Names

Calpain-6, Calpain-like protease X-linked, Calpamodulin, CalpM, CAPN6, CALPM, CANPX

Target/Specificity

This CAPN6 antibody is generated from a mouse immunized with a recombinant protein of human CAPN6.

Dilution

WB~~1:1000

FC~~1:25

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

CAPN6 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

CAPN6 Antibody - Protein Information

Western blot analysis of lysate from human placenta tissue lysate, using CAPN6 Antibody (Cat. #AM8453b). AM8453b was diluted at 1:1000. A goat anti-mouse IgG H&L(HRP) at 1:3000 dilution was used as the secondary antibody. Lysate at 20µg.

Flow cytometric analysis of A549 cells using CAPN6 Antibody (green, Cat#) compared to an isotype control of mouse IgG1 (blue). CAPN6 Antibody was diluted at 1:25 dilution. An Alexa Fluor® 488 goat anti-mouse IgG at 1:400 dilution was used as the secondary antibody.

Name CAPN6**Synonyms** CALPM, CANPX**Function**

Microtubule-stabilizing protein that may be involved in the regulation of microtubule dynamics and cytoskeletal organization. May act as a regulator of RAC1 activity through interaction with ARHGEF2 to control lamellipodial formation and cell mobility. Does not seem to have protease activity as it has lost the active site residues (By similarity).

Cellular Location

Cytoplasm, perinuclear region. Cytoplasm, cytoskeleton, spindle. Note=During mitose associated with the mitotic spindle. At telophase colocalized to the midbody spindle

Tissue Location

Expressed only in placenta.

CAPN6 Antibody - Background

Microtubule-stabilizing protein that may be involved in the regulation of microtubule dynamics and cytoskeletal organization. May act as a regulator of RAC1 activity through interaction with ARHGEF2 to control lamellipodial formation and cell mobility. Does not seem to have protease activity as it has lost the active site residues (By similarity).
