| Antigen Region    | 104-132                     |

**IL21 Antibody (C-term) - Additional Information**

**Gene ID** 59067

**Other Names**

Interleukin-21, IL-21, Za11, IL21

**Target/Specificity**

This IL21 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 104-132 amino acids from the C-terminal region of human IL21.

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

IL21 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

IL21 Antibody (C-term) (Cat. #AP13840b) western blot analysis in CEM cell line lysates (35ug/lane). This demonstrates the IL21 antibody detected the IL21 protein (arrow).

Western blot analysis of IL21 (arrow) using rabbit polyclonal IL21 Antibody (C-term) (Cat. #AP13840b). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the IL21 gene.

**IL21 Antibody (C-term) - Background**

Cytokine with immunoregulatory activity. May promote the transition between innate and adaptive immunity. Induces the production of IgG(1) and IgG(3) in B-cells (By similarity). May

**IL21 Antibody (C-term) - Protein Information****Name** IL21 ([HGNC:6005](#))**Function**

Cytokine with immunoregulatory activity. May promote the transition between innate and adaptive immunity. Induces the production of IgG(1) and IgG(3) in B-cells (By similarity). Implicated in the generation and maintenance of T follicular helper (Tfh) cells and the formation of germinal-centers. Together with IL6, control the early generation of Tfh cells and are critical for an effective antibody response to acute viral infection (By similarity). May play a role in proliferation and maturation of natural killer (NK) cells in synergy with IL15. May regulate proliferation of mature B- and T-cells in response to activating stimuli. In synergy with IL15 and IL18 stimulates interferon gamma production in T-cells and NK cells (PubMed:<a href="http://www.uniprot.org/citations/11081504" target="\_blank">11081504</a>, PubMed:<a href="http://www.uniprot.org/citations/15178704" target="\_blank">15178704</a>). During T-cell mediated immune response may inhibit dendritic cells (DC) activation and maturation (By similarity).

**Cellular Location**

Secreted.

**Tissue Location**

Expressed in activated CD4-positive T-cells but not in CD8-positive T-cells, B-cells, or monocytes

play a role in proliferation and maturation of natural killer (NK) cells in synergy with IL15. May regulate proliferation of mature B-and T-cells in response to activating stimuli. In synergy with IL15 and IL18 stimulates interferon gamma production in T-cells and NK cells. During T-cell mediated immune response may inhibit dendritic cells (DC) activation and maturation.
