

## **ECSIT Antibody (C-term)**

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP14858b

### **Specification**

#### **ECSIT Antibody (C-term) - Product Information**

Application IF, WB,E Primary Accession 098095

Other Accession NP 001135936.1,

NP 057665.2

ECSIT Antibody (C-term) - Additional Information

#### **Gene ID** 51295

#### **Other Names**

Evolutionarily conserved signaling intermediate in Toll pathway, mitochondrial, Protein SITPEC, ECSIT

## Target/Specificity

This ECSIT antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 396-425 amino acids from the C-terminal region of human ECSIT.

## Dilution

IF~~1:10~50 WB~~1:1000

# **Format**

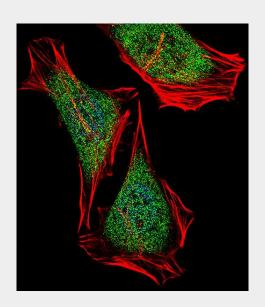

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

#### **Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

ECSIT Antibody (C-term) is for research use

Fluorescent confocal image of Hela cell stained with ECSIT Antibody (C-term)(Cat#AP14858b).Hela cells were fixed with 4% PFA (20 min), permeabilized with Triton X-100 (0.1%, 10 min), then incubated with ECSIT primary antibody (1:25, 1 h at 37°C). For secondary antibody, Alexa Fluor® 488 conjugated donkey anti-rabbit antibody (green) was used (1:400, 50 min at 37°C).Cytoplasmic actin was counterstained with Alexa Fluor® 555 (red) conjugated Phalloidin (7units/ml, 1 h at 37°C). Nuclei were counterstained with DAPI (blue) (10 ug/ml, 10 min). ECSIT immunoreactivity is localized to Cytoplasm and Nucleus significantly.

only and not for use in diagnostic or therapeutic procedures.

#### ECSIT Antibody (C-term) - Protein Information

#### Name ECSIT

#### **Function**

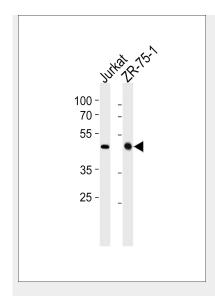

Adapter protein of the Toll-like and IL-1 receptor signaling pathway that is involved in the activation of NF-kappa-B via MAP3K1. Promotes proteolytic activation of MAP3K1. Involved in the BMP signaling pathway. Required for normal embryonic development (By similarity).

# **Cellular Location**Cytoplasm. Nucleus. Mitochondrion

# **ECSIT Antibody (C-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

ECSIT Antibody (C-term) (Cat. #AP14858b) western blot analysis in Jurkat, ZR-75-1 cell line lysates (35ug/lane). This demonstrates the ECSIT antibody detected the ECSIT protein (arrow).

# ECSIT Antibody (C-term) - Background

Adapter protein of the Toll-like and IL-1 receptor signaling pathway that is involved in the activation of NF-kappa-B via MAP3K1. Promotes proteolytic activation of MAP3K1. Involved in the BMP signaling pathway. Required for normal embryonic development (By similarity). Required for efficient assembly of mitochondrial NADH:ubiquinone oxidoreductase.
