

CD40 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP17871b

Specification

CD40 Antibody (C-term) - Product Information

Application WB,E Primary Accession P25942

Other Accession <u>Q8SQ34</u>, <u>P27512</u>,

NP 001241.1,

Q3ZTK5

Reactivity Human

Predicted Horse, Mouse, Pig

Host Rabbit
Clonality Polyclonal
Isotype Rabbit Ig
Calculated MW 30619
Antigen Region 247-276

CD40 Antibody (C-term) - Additional Information

Gene ID 958

Other Names

Tumor necrosis factor receptor superfamily member 5, B-cell surface antigen CD40, Bp50, CD40L receptor, CDw40, CD40, CD40, TNFRSF5

Target/Specificity

This CD40 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 247-276 amino acids from the C-terminal region of human CD40.

Dilution

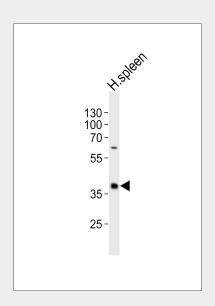

WB~~1:1000

Format

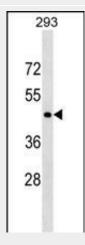

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Western blot analysis of lysate from human spleen tissue lysate, using CD40 Antibody (C-term)(Cat. #AP17871B). AP17871B was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody. Lysate at 20ug.

CD40 Antibody (C-term) (Cat. #AP17871b) western blot analysis in 293 cell line lysates (35ug/lane). This demonstrates the CD40 antibody detected the CD40 protein (arrow).

CD40 Antibody (C-term) - Background

Tel: 858.875.1900 Fax: 858.622.0609

Precautions

CD40 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

CD40 Antibody (C-term) - Protein Information

Name CD40

Synonyms TNFRSF5

Function

Receptor for TNFSF5/CD40LG (PubMed: <a h ref="http://www.uniprot.org/citations/31331 973" target=" blank">31331973). Transduces TRAF6- and MAP3K8-mediated signals that activate ERK in macrophages and B cells, leading to induction of immunoglobulin secretion (By similarity).

Cellular Location

[Isoform I]: Cell membrane; Single-pass type I membrane protein

Tissue Location

B-cells and in primary carcinomas.

CD40 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

The protein encoded by this gene is a member of the

TNF-receptor superfamily. This receptor has been found to be

essential in mediating a broad variety of immune and inflammatory

responses including T cell-dependent immunoglobulin class

switching, memory B cell development, and germinal center

formation. AT-hook transcription factor AKNA is reported to

coordinately regulate the expression of this receptor and its

ligand, which may be important for homotypic cell interactions.

Adaptor protein TNFR2 interacts with this receptor and serves as a

mediator of the signal transduction. The interaction of this

receptor and its ligand is found to be necessary for

amyloid-beta-induced microglial activation, and thus is thought to

be an early event in Alzheimer disease pathogenesis. Two

alternatively spliced transcript variants of this gene encoding

distinct isoforms have been reported.
