

USP12 Antibody (C-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP2140b

Specification

USP12 Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	O75317
Other Accession	P62069 , P62068 , A5WWB0 , Q9D9M2 , A4FUN7 , A5D9H7 , Q5M981 , Q52KZ6 , NP_872294 , F1M625
Reactivity Predicted	Human Xenopus, Bovine, Zebrafish, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit Ig
Antigen Region	315-345

USP12 Antibody (C-term) - Additional Information

Gene ID 219333

Other Names

Ubiquitin carboxyl-terminal hydrolase 12,
Deubiquitinating enzyme 12, Ubiquitin
thioesterase 12, Ubiquitin-hydrolyzing
enzyme 1, Ubiquitin-specific-processing
protease 12, USP12, UBH1, USP12L1

Target/Specificity

This USP12/USP46 antibody is generated
from rabbits immunized with a KLH
conjugated synthetic peptide between
315-345 amino acids from the C-terminal
region of human USP12/USP46.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS
with 0.09% (W/V) sodium azide. This
antibody is prepared by Saturated
Ammonium Sulfate (SAS) precipitation
followed by dialysis against PBS.

Western blot analysis of USP12/USP46
Antibody (C-term) (Cat. #AP2140b) in
MDA-MB231 cell line lysates (35ug/lane).
USP12/USP46 (arrow) was detected using the
purified Pab.

Western blot analysis of USP12 (arrow) using
rabbit polyclonal USP12 Antibody (L315) (Cat.
#AP2140b). 293 cell lysates (2 ug/lane)
either nontransfected (Lane 1) or transiently
transfected (Lane 2) with the USP12 gene.

USP12 Antibody (C-term) - Background

Modification of target proteins by ubiquitin
participates in a wide array of biological
functions. Proteins destined for degradation or

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

USP12 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

USP12 Antibody (C-term) - Protein Information

Name USP12

Synonyms UBH1, USP12L1

Function

Deubiquitinating enzyme. Has almost no deubiquitinating activity by itself and requires the interaction with WDR20 and WDR48 to have a high activity (PubMed:19075014, PubMed:27373336). Not involved in deubiquitination of monoubiquitinated FANCD2 (PubMed:19075014). In complex with WDR48, acts as a potential tumor suppressor by positively regulating PHLPP1 stability (PubMed:24145035).

processing via the 26 S proteasome are coupled to multiple copies of ubiquitin. However, attachment of ubiquitin or ubiquitin-related molecules may also result in changes in subcellular distribution or modification of protein activity. An additional level of ubiquitin regulation, deubiquitination, is catalyzed by proteases called deubiquitinating enzymes, which fall into four distinct families. Ubiquitin C-terminal hydrolases, ubiquitin-specific processing proteases (USPs),¹ OTU-domain ubiquitin-aldehyde-binding proteins, and Jab1/Pad1/MPN-domain-containing metallo-enzymes. Among these four families, USPs represent the most widespread and represented deubiquitinating enzymes across evolution. USPs tend to release ubiquitin from a conjugated protein. They display similar catalytic domains containing conserved Cys and His boxes but divergent N-terminal and occasionally C-terminal extensions, which are thought to function in substrate recognition, subcellular localization, and protein-protein interactions.
