

**Msx2 Antibody (N-term)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP2709a**

### Specification

#### Msx2 Antibody (N-term) - Product Information

Application	WB, E
Primary Accession	<a href="#">P35548</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit Ig
Calculated MW	28897
Antigen Region	1-30

#### Msx2 Antibody (N-term) - Additional Information

**Gene ID** 4488

#### Other Names

Homeobox protein MSX-2, Homeobox protein Hox-8, MSX2, HOX8

#### Target/Specificity

This Msx2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human Msx2.

#### Dilution

WB~1:1000

#### Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### Precautions

Msx2 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

Western blot analysis of Msx2 (arrow) using rabbit polyclonal Msx2 Antibody (Human N-term) (Cat.#AP2709a). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected with the Msx2 gene (Lane 2) (Origene Technologies).

#### Msx2 Antibody (N-term) - Background

Msx2 is a transcriptional repressor whose normal activity may establish a balance between survival and apoptosis of neural crest-derived cells required for proper craniofacial morphogenesis. This protein may also have a role in promoting cell growth under certain conditions and may be an important target for the RAS signaling pathways. Mutations in the Msx2 gene are associated with parietal foramina 1 and craniosynostosis type 2.

**Msx2 Antibody (N-term) - Protein Information****Name** MSX2**Synonyms** HOX8**Function**

Acts as a transcriptional regulator in bone development. Represses the ALPL promoter activity and antagonizes the stimulatory effect of DLX5 on ALPL expression during osteoblast differentiation. Probable morphogenetic role. May play a role in limb-pattern formation. In osteoblasts, suppresses transcription driven by the osteocalcin FGF response element (OCFRE). Binds to the homeodomain-response element of the ALPL promoter.

**Cellular Location**

Nucleus.

**Msx2 Antibody (N-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.
