FTO Antibody (N-term) - Additional Information

1-30

#### **Gene ID 79068**

Antigen Region

### **Other Names**

Alpha-ketoglutarate-dependent dioxygenase FTO, 11411-, Fat mass and obesity-associated protein, FTO, KIAA1752

# **Target/Specificity**

This FTO antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human FTO.

## Dilution

WB~~1:1000 IHC-P~~1:50~100 FC~~1:10~50

### **Format**

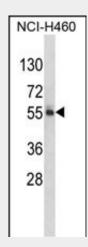

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

# **Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

# **Precautions**

FTO Antibody (N-term) is for research use only and not for use in diagnostic or

Western blot analysis of FTO Antibody (N-term) (Cat. #AP6976a) in NCI-H460 cell line lysates (35ug/lane). FTO (arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human brain tissue reacted with FTO Antibody (N-term), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

therapeutic procedures.

## FTO Antibody (N-term) - Protein Information

### Name FTO

{ECO:0000303|PubMed:17496892, ECO:0000312|HGNC:HGNC:24678}

#### **Function**

RNA demethylase that mediates oxidative demethylation of different RNA species, such as mRNAs, tRNAs and snRNAs, and acts as a regulator of fat mass, adipogenesis and energy homeostasis (PubMed:<a href="http://www.uniprot.org/c itations/22002720"

target=" blank">22002720</a>,

PubMed:<a href="http://www.uniprot.org/ci tations/26458103"

target="\_blank">26458103</a>,

PubMed:<a href="http://www.uniprot.org/ci tations/28002401"

target=" blank">28002401</a>,

PubMed:<a href="http://www.uniprot.org/ci tations/30197295"

target="\_blank">30197295</a>,

PubMed:<a href="http://www.uniprot.org/ci tations/26457839"

target=" blank">26457839</a>,

PubMed:<a href="http://www.uniprot.org/ci tations/25452335"

target="\_blank">25452335</a>).

Specifically demethylates N(6)-

methyladenosine (m6A) RNA, the most

prevalent internal modification of

messenger RNA (mRNA) in higher

eukaryotes (PubMed:<a href="http://www.u niprot.org/citations/22002720"

target=" blank">22002720</a>,

PubMed: <a href="http://www.uniprot.org/ci tations/26458103"

target="\_blank">26458103</a>,

PubMed: <a href="http://www.uniprot.org/ci tations/30197295"

target=" blank">30197295</a>.

PubMed: <a href="http://www.uniprot.org/ci tations/26457839"

target=" blank">26457839</a>,

PubMed:<a href="http://www.uniprot.org/ci

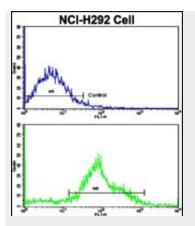

tations/25452335" target="\_blank">25452335</a>). M6A

demethylation by FTO affects mRNA

expression and stability (PubMed:<a href="

http://www.uniprot.org/citations/30197295" target="\_blank">30197295</a>). Also able

to demethylate m6A in U6 small nuclear

Flow cytometric analysis of NCI-H292 cells using FTO Antibody (N-term)(bottom histogram) compared to a negative control cell (top histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

# FTO Antibody (N-term) - Background

The precise function of FTO remains to be determined.

# FTO Antibody (N-term) - References

Scott,L.J., et.al., Science 316 (5829), 1341-1345 (2007)

RNA (snRNA) (PubMed:<a href="http://www .uniprot.org/citations/30197295" target=" blank">30197295</a>). Mediates demethylation of N(6),2'-Odimethyladenosine cap (m6A(m)), by demethylating the N(6)- methyladenosine at the second transcribed position of mRNAs and U6 snRNA (PubMed: <a href="ht">ht</a> tp://www.uniprot.org/citations/28002401" target=" blank">28002401</a>, PubMed: <a href="http://www.uniprot.org/ci"> tations/30197295" target=" blank">30197295</a>). Demethylation of m6A(m) in the 5'-cap by FTO affects mRNA stability by promoting susceptibility to decapping (PubMed: <a href ="http://www.uniprot.org/citations/2800240 1" target=" blank">28002401</a>). Also acts as a tRNA demethylase by removing N(1)-methyladenine from various tRNAs (PubMed:<a href="http://www.uniprot.org/c itations/30197295" target=" blank">30197295</a>). Has no activity towards 1-methylguanine (PubMed:<a href="http://www.uniprot.org/c itations/20376003" target=" blank">20376003</a>). Has no detectable activity towards double-stranded DNA (PubMed:<a href="http://www.uniprot. org/citations/20376003" target=" blank">20376003</a>). Also able to repair alkylated DNA and RNA by oxidative demethylation: demethylates single-stranded RNA containing 3-methyluracil, single- stranded DNA containing 3-methylthymine and has low demethylase activity towards single-stranded DNA containing 1-methyladenine or 3- methylcytosine (PubMed:<a href="http://www.uniprot.org/c itations/18775698" target=" blank">18775698</a>, PubMed:<a href="http://www.uniprot.org/ci tations/20376003" target=" blank">20376003</a>). Ability to repair alkylated DNA and RNA is however unsure in vivo (PubMed:<a href="http://ww w.uniprot.org/citations/18775698" target=" blank">18775698</a>, PubMed:<a href="http://www.uniprot.org/ci tations/20376003" target=" blank">20376003</a>). Involved in the regulation of fat mass, adipogenesis and body weight, thereby contributing to the regulation of body size and body fat accumulation (PubMed:<a href="http://ww

w.uniprot.org/citations/18775698"

target=" blank">18775698</a>, PubMed:<a href="http://www.uniprot.org/ci tations/20376003" target="\_blank">20376003</a>). Involved in the regulation of thermogenesis and the control of adipocyte differentiation into brown or white fat cells (PubMed:<a href=" http://www.uniprot.org/citations/26287746" target=" blank">26287746</a>). Regulates activity of the dopaminergic midbrain circuitry via its ability to demethylate m6A in mRNAs (By similarity). Plays an oncogenic role in a number of acute myeloid leukemias by enhancing leukemic oncogene-mediated cell transformation: acts by mediating m6A demethylation of target transcripts such as MYC, CEBPA, ASB2 and RARA, leading to promote their expression (PubMed:<a href= "http://www.uniprot.org/citations/28017614 "target=" blank">28017614</a>, PubMed:<a href="http://www.uniprot.org/ci tations/29249359" target="\_blank">29249359</a>).

#### **Cellular Location**

Nucleus. Nucleus speckle. Cytoplasm Note=Localizes mainly in the nucleus, where it is able to demethylate N(6)-methyladenosine (m6A) and N(6),2'-O-dimethyladenosine cap (m6A(m)) in U6 small nuclear RNA (snRNA), N(1)-methyladenine from tRNAs and internal m6A in mRNAs (PubMed:30197295). In the cytoplasm, mediates demethylation of m6A and m6A(m) in mRNAs and N(1)-methyladenine from tRNAs (PubMed:30197295).

#### **Tissue Location**

Ubiquitously expressed, with relatively high expression in adrenal glands and brain; especially in hypothalamus and pituitary (PubMed:17434869, PubMed:17496892). Highly expressed in highly expressed in acute myeloid leukemias (AML) with t(11;11)(q23;23) with KMT2A/MLL1 rearrangements, t(15;17)(q21;q21)/PML-RARA, FLT3-ITD, and/or NPM1 mutations (PubMed:28017614).

## FTO Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Western Blot

- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
