

IGFBP3 Antibody (N-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7641A

Specification

IGFBP3 Antibody (N-term) - Product Information

Application	WB, IHC-P,E
Primary Accession	P17936
Other Accession	P15473
Reactivity	Human
Predicted	Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit Ig
Calculated MW	31674
Antigen Region	163-193

IGFBP3 Antibody (N-term) - Additional Information

Gene ID 3486

Other Names

Insulin-like growth factor-binding protein 3, IBP-3, IGF-binding protein 3, IGFBP-3, IGFBP3, IBP3

Target/Specificity

This IGFBP3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 163-193 amino acids from the N-terminal region of human IGFBP3.

Dilution

WB~~1:1000
IHC-P~~1:10~50

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Western blot analysis of anti-IGFBP3 Antibody (N-term) (Cat. #AP7641a) in HepG2 cell line lysates (35ug/lane). IGFBP3(arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human hepatocarcinoma tissue reacted with IGFBP3 Antibody (N-term) (Cat.#AP7641a), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry;

IGFBP3 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

clinical relevance has not been evaluated.

IGFBP3 Antibody (N-term) - Protein Information

Name IGFBP3

Synonyms IBP3

Function

IGF-binding proteins prolong the half-life of the IGFs and have been shown to either inhibit or stimulate the growth promoting effects of the IGFs on cell culture. They alter the interaction of IGFs with their cell surface receptors. Also exhibits IGF-independent antiproliferative and apoptotic effects mediated by its receptor TMEM219/IGFBP-3R.

Cellular Location

Secreted.

Tissue Location

Expressed by most tissues. Present in plasma.

IGFBP3 Antibody (N-term) - Background

IGFBP3 is a member of the insulin-like growth factor binding protein (IGFBP) family with an IGFBP domain and a thyroglobulin type-I domain. The protein forms a ternary complex with insulin-like growth factor acid-labile subunit (IGFALS) and either insulin-like growth factor (IGF) I or II. In this form, it circulates in the plasma, prolonging the half-life of IGFs and altering their interaction with cell surface receptors.
