CCNB1 Blocking Peptide (N-term S35)

Synthetic peptide
Catalog # BP20205a

Specification

CCNB1 Blocking Peptide (N-term S35) - Product Information

Primary Accession	P14635
Other Accession	NP_114172.1

CCNB1 Blocking Peptide (N-term S35) - Additional Information

Gene ID 891

Other Names
G2/mitotic-specific cyclin-B1, CCNB1, CCNB

Target/Specificity
The synthetic peptide sequence is selected from aa 28-42 of HUMAN CCNB1

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CCNB1 Blocking Peptide (N-term S35) - Protein Information

Name CCNB1

Synonyms CCNB

Function
Essential for the control of the cell cycle at the G2/M (mitosis) transition.

Cellular Location

CCNB1 Blocking Peptide (N-term S35) - Background

The protein encoded by this gene is a regulatory protein involved in mitosis. The gene product complexes with p34(cdc2) to form the maturation-promoting factor (MPF). Two alternative transcripts have been found, a constitutively expressed transcript and a cell cycle-regulated transcript, that is expressed predominantly during G2/M phase. The different transcripts result from the use of alternate transcription initiation sites. [provided by RefSeq].
