

THY1 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP2050a**Specification****THY1 Antibody (N-term) Blocking Peptide -
Product Information**Primary Accession [P04216](#)**THY1 Antibody (N-term) Blocking Peptide -
Additional Information****Gene ID** 7070**Other Names**Thy-1 membrane glycoprotein, CDw90,
Thy-1 antigen, CD90, THY1**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP2050a](/product/products/AP2050a) was selected from the N-term region of human THY1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**THY1 Antibody (N-term) Blocking Peptide -
Protein Information****Name** THY1**Function****THY1 Antibody (N-term) Blocking Peptide -
Background**

CD90 (Thy1) antigen is a GPI linked glycoprotein member of the Immunoglobulin superfamily. It is expressed on murine T cells, thymocytes, neural cells, cells of granulocytic lineage, early hematopoietic progenitors, fibroblasts, neurons and Kupffer's cells. Thy1 may play a role in cell to cell or cell to ligand interactions during synaptogenesis and other events in the brain.
