

(Mouse) Bmi1 Blocking Peptide (Center)
Synthetic peptide
Catalog # BP21471c**Specification****(Mouse) Bmi1 Blocking Peptide (Center) - Product Information**Primary Accession [P25916](#)**(Mouse) Bmi1 Blocking Peptide (Center) - Additional Information****Gene ID** 12151**Other Names**

Polycomb complex protein BMI-1, Polycomb group RING finger protein 4, Bmi1, Bmi-1, Pcgf4

Target/Specificity

The synthetic peptide sequence is selected from aa 109-123 of HUMAN Bmi1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Component of a Polycomb group (PcG) multiprotein PRC1-like complex, a complex class required to maintain the

(Mouse) Bmi1 Blocking Peptide (Center) - Background

Component of a Polycomb group (PcG) multiprotein PRC1-like complex, a complex class required to maintain the transcriptionally repressive state of many genes, including Hox genes, throughout development. PcG PRC1 complex acts via chromatin remodeling and modification of histones; it mediates monoubiquitination of histone H2A 'Lys-119', rendering chromatin heritably changed in its expressibility. In the PRC1 complex, it is required to stimulate the E3 ubiquitin-protein ligase activity of RNF2/RING2 (By similarity).

transcriptionally repressive state of many genes, including Hox genes, throughout development. PcG PRC1 complex acts via chromatin remodeling and modification of histones; it mediates monoubiquitination of histone H2A 'Lys-119', rendering chromatin heritably changed in its expressibility. The complex composed of RNF2, UB2D3 and BMI1 binds nucleosomes, and has activity only with nucleosomal histone H2A. In the PRC1-like complex, regulates the E3 ubiquitin-protein ligase activity of RNF2/RING2 (By similarity).

Cellular Location

Nucleus {ECO:0000250|UniProtKB:P35226}.
Cytoplasm
{ECO:0000250|UniProtKB:P35226}

Tissue Location

Detected in most organs with high expression levels in thymus, heart, brain and testis

(Mouse) Bmi1 Blocking Peptide (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.
