

NRAS Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP7745b**Specification****NRAS Antibody (C-term) Blocking Peptide -
Product Information**Primary Accession [P01111](#)**NRAS Antibody (C-term) Blocking Peptide -
Additional Information****Gene ID** 4893**Other Names**GTPase NRas, Transforming protein N-Ras,
NRAS, HRAS1**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP7745b](#) was selected from the C-term region of human NRAS. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**NRAS Antibody (C-term) Blocking Peptide -
Protein Information****Name** NRAS**Synonyms** HRAS1**NRAS Antibody (C-term) Blocking Peptide
- Background**

NRAS is a membrane protein that shuttles between the Golgi apparatus and the plasma membrane. This shuttling is regulated through palmitoylation and depalmitoylation by the ZDHHC9-GOLGA7 complex. This protein, which has intrinsic GTPase activity, is activated to a GTP-bound form by a GTPase activating protein and inactivated to a GDP-bound form by a guanine nucleotide-exchange factor. Defects in the gene encoding this protein are a cause of juvenile myelomonocytic leukemia (JMML).

Function

Ras proteins bind GDP/GTP and possess intrinsic GTPase activity.

Cellular Location

Cell membrane; Lipid-anchor; Cytoplasmic side. Golgi apparatus membrane; Lipid-anchor Note=Shuttles between the plasma membrane and the Golgi apparatus
