

AREG Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP7776b**Specification****AREG Antibody (C-term) Blocking Peptide -
Product Information**

Primary Accession [P15514](#)
Other Accession [NP_001648](#)

**AREG Antibody (C-term) Blocking Peptide -
Additional Information**

Gene ID 374

Other Names

Amphiregulin, AR, Colorectum cell-derived growth factor, CRDGF, AREG, SDGF

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7776b](#) was selected from the C-term region of human AREG. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**AREG Antibody (C-term) Blocking Peptide -
Protein Information**

Name AREG ([HGNC:651](#))

**AREG Antibody (C-term) Blocking Peptide -
Background**

AREG is a member of the epidermal growth factor family. It is an autocrine growth factor as well as a mitogen for astrocytes, Schwann cells, and fibroblasts. It is related to epidermal growth factor (EGF) and transforming growth factor alpha (TGF-alpha). This protein interacts with the EGF/TGF-alpha receptor to promote the growth of normal epithelial cells and inhibits the growth of certain aggressive carcinoma cell lines. This protein is associated with a psoriasis-like skin phenotype.

Function

Ligand of the EGF receptor/EGFR. Autocrine growth factor as well as a mitogen for a broad range of target cells including astrocytes, Schwann cells and fibroblasts.

Cellular Location

Membrane; Single-pass membrane protein.

AREG Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
