

IRS2 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP7789b**Specification****IRS2 Antibody (C-term) Blocking Peptide - Product Information**Primary Accession [Q9Y4H2](#)**IRS2 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 8660**Other Names**

Insulin receptor substrate 2, IRS-2, IRS2

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7789b](#) was selected from the C-term region of human IRS2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

IRS2 Antibody (C-term) Blocking Peptide - Protein Information**Name** IRS2**Function**

May mediate the control of various cellular

IRS2 Antibody (C-term) Blocking Peptide - Background

Insulin receptor substrate 2, a cytoplasmic signaling molecule that mediates effects of insulin, insulin-like growth factor 1, and other cytokines by acting as a molecular adaptor between diverse receptor tyrosine kinases and downstream effectors. This protein is phosphorylated by the insulin receptor tyrosine kinase upon receptor stimulation, as well as by an interleukin 4 receptor-associated kinase in response to IL4 treatment.
