

FGF10 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP7975b**Specification****FGF10 Antibody (C-term) Blocking Peptide -
Product Information**Primary Accession [O15520](#)**FGF10 Antibody (C-term) Blocking Peptide -
Additional Information****Gene ID** 2255**Other Names**Fibroblast growth factor 10, FGF-10,
Keratinocyte growth factor 2, FGF10**Target/Specificity**

The synthetic peptide sequence used to generate the antibody AP7975b was selected from the C-term region of human FGF10. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**FGF10 Antibody (C-term) Blocking Peptide -
Protein Information****Name** FGF10**Function****FGF10 Antibody (C-term) Blocking Peptide
- Background**

FGF10 is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This protein exhibits mitogenic activity for keratinizing epidermal cells, but essentially no activity for fibroblasts, which is similar to the biological activity of FGF7. Studies of the mouse homolog of suggested that this gene is required for embryonic epidermal morphogenesis including brain development, lung morphogenesis, and initiation of limb bud formation. This protein is also implicated to be a primary factor in the process of wound healing.

Plays an important role in the regulation of embryonic development, cell proliferation and cell differentiation. Required for normal branching morphogenesis. May play a role in wound healing.

Cellular Location

Secreted.
