Target/Specificity

The synthetic peptide sequence used to
generate the antibody [AP8554c](/products/AP8554c)
was selected from the Center region of
human MST1. A 10 to 100 fold molar excess
to antibody is recommended. Precise
conditions should be optimized for a
particular assay.

Format

Peptides are lyophilized in a solid powder
format. Peptides can be reconstituted in
solution using the appropriate buffer as
needed.

Storage

Maintain refrigerated at 2-8°C for up to 6
months. For long term storage store at
-20°C.

Precautions

This product is for research use only. Not
for use in diagnostic or therapeutic
procedures.

Background**

MST1 probably has no proteolytic activity,
since crucial characteristic of serine proteases
catalytic sites are not conserved.
