

**UBTF Antibody (N-term) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP8572a****Specification****UBTF Antibody (N-term) Blocking Peptide -  
Product Information**Primary Accession [P17480](#)**UBTF Antibody (N-term) Blocking Peptide -  
Additional Information****Gene ID** 7343**Other Names**Nucleolar transcription factor 1,  
Autoantigen NOR-90, Upstream-binding  
factor 1, UBF-1, UBTF, UBF, UBF1**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP8572a](/products/AP8572a) was selected from the N-term region of human UBTF. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**UBTF Antibody (N-term) Blocking Peptide -  
Protein Information****Name** UBTF**UBTF Antibody (N-term) Blocking Peptide -  
Background**

UBF is a nucleolar phosphoprotein with both DNA binding and transactivation domains. Sequence-specific DNA binding to the core and upstream control elements of the human rRNA promoter is mediated through several HMG boxes.

**UBTF Antibody (N-term) Blocking Peptide -  
References**

**Synonyms** UBF, UBF1

**Function**

Recognizes the ribosomal RNA gene promoter and activates transcription mediated by RNA polymerase I through cooperative interactions with the transcription factor SL1/TIF-IB complex. It binds specifically to the upstream control element.

**Cellular Location**

Nucleus, nucleolus  
{ECO:0000250|UniProtKB:P25976}

**UBTF Antibody (N-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.
