IGSF4B Polyclonal Antibody - Protein Information

Name CADM3

Synonyms IGSF4B, NECL1, SYNCAM3, TSLL1

Function

Involved in cell-cell adhesion. Has both calcium-independent homophilic cell-cell adhesion activity and calcium-independent heterophilic cell-cell adhesion activity with IGSF4, NECTIN1 and NECTIN3. Interaction with EPB41L1 may regulate structure or function of cell-cell junctions (By similarity).

Cellular Location

Cell membrane; Single-pass type I membrane protein. Cell junction

Tissue Location

Isoform 1 is expressed mainly in adult and fetal brain. Isoform 2 is highly expressed in adult brain

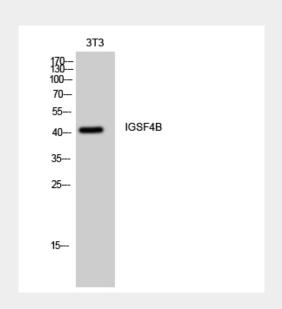

and weakly expressed in placenta. In brain, Isoform 2 is highly expressed in cerebellum.
