

A5261

Leader in Biomolecular Solutions for Life Science

EPHA1 Rabbit pAb

Catalog No.: A5261

Basic Information

Observed MW

150kDa

Calculated MW

108kDa

Category

Polyclonal Antibody

Applications

WB

Cross-Reactivity

Human

Background

This gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events, particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing a Cys-rich domain and 2 fibronectin type III repeats. The ephrin receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. This gene is expressed in some human cancer cell lines and has been implicated in carcinogenesis.

Recommended Dilutions

WB 1:500 - 1:1000

Immunogen Information

Gene ID

2041

Swiss Prot

P21709

Immunogen

Synthetic peptide. This information is considered to be commercially sensitive.

Synonyms

EPH; EPHT; EPHT1; EPHA1

Contact

 www.abclonal.com

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at 4°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.02% sodium azide, pH7.3.

Validation Data

Western blot analysis of various lysates using EPHA1 Rabbit pAb (A5261).
Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution.
Lysates/proteins: 25µg per lane.
Blocking buffer: 3% nonfat dry milk in TBST.
